

ABSTRACT

Based on the 1945 Constitution, the state is obligated to serve every citizen in order to meet the basic needs and rights through public service, public service encourages community to appreciate the performance of the government as well as provide better perception and build to the government. In order to improve and maximize the performance of civil apparatus, the Government issued Law No. 5 by 2014 which is discuss about the Management of civil apparatus should be based in the meritocracy (merit system). However meritocracy which is prioritize the result of work depends on the using technologies. So technology is one of the Government's way to improve the quality of providing public services. This research aims to describe the implementation of Information Communication and Technologies (ICT) in Yogyakarta Meritocracy System.
