

ABSTRACT

This study aims to analyze and provide empirical evidence of the influence of dividend policy and return on equity on firm value with corporate social responsibility as moderating variables.

Using 67 data from manufacturing companies listed in Indonesia stock exchange period 2013-2015 which selected with purposive sampling method and processed with multiple regression, the result showed that dividend policy and return on equity have a positive influence on firm value. Return on equity with corporate social responsibility as moderating variable has influence to firm value.

Keywords: dividend policy, ROE, corporate social responsibility, firm value
