

ABSTRACT

This final undergraduate thesis tried to discuss about the Malaysian Policy on Its Education Internationalization, Malaysia is a country which consist of various ethnic group or we know as multiethnic population, according to the population census there are three ethnicities which have the biggest population in Malaysia, from 29.17 million the total Malaysian's population. The difference point of view among the society with the multiethnic raises many problems in the country, there needs to be a change in the education filed, because education is a place that will change the pattern of thinking each individual in order to face globalization by internationalize its education system. Besides, this final undergraduate thesis is also write in order to fulfill one of the requarement of bachelor degree program in International Relation Department, Social Political Science Faculty of University of Muhammadiyah Yogyakarta.
