

INTISARI

Di setiap pusat pelayanan kesehatan, dapat terjadi transmisi penularan penyakit baik secara langsung maupun tidak langsung, karena prosedur klinik tidak diikuti atau diabaikan oleh petugas kesehatan. Universal precaution dilakukan untuk melindungi pasien dan petugas kesehatan di pelayanan kesehatan gigi. Penelitian ini menggunakan mix methode yaitu metode kuantitatif dan metode kualitatif. Pengumpulan data menggunakan obsevasi, wawancara dan focus group discussion. Penelitian ini dilakukan di RSGMP UMY, subjeknya adalah 60 mahasiswa koass dan 20 dosen. Hasil penelitian ini menunjukkan bahwa pengetahuan responden mengenai universal precaution sudah baik, tetapi perilaku mahasiswa koass dan dosen dapat dikatakan tidak dalam katagori yang baik. Kendala tidak dapat terlaksananya universal precaution di RSGMP UMY adalah karena faktor waktu, responden tidak mempunyai banyak waktu untuk melaksanakan posedur universal precaution. Support manajemen RSGMP UMY mengenai pelaksanaan universal precaution sudah baik. Sarana prasarana sudah diberikan secara optimal.

Kata kunci : universal precaution, pelayanan kesehatan gigi.

ABSTRACT

In every health care facility, disease infection is prone to happen both directly and indirectly because the clinical procedures are not performed or neglected by the medical workers. Universal precaution is used to protect the patients and medical workers in dental care service. This research used mix-method that is quantitative and qualitative method. Data collection was done through observation, interview, and focus group discussion. This research was conducted at RSGMP UMY involving 60 students who were doing their co-assistance and 20 lecturers as the research subject. The research result shows that the respondent's understanding upon universal precaution is good, but not for their attitude. Universal precaution is not performed in RSGMP UMY well due to time factor; the respondents have less time to perform the procedures of universal precaution. The support given by the management of RSGMP UMY toward the universal precaution is good enough. The infrastructures are given optimally.

Key word: universal precaution, dental services.
