

INTISARI

Analisis kelayakan usaha budidaya udang *vannamei* di Pantai Trisik Desa Karangsewu Kecamatan Galur Kabupaten Kulon Progo. Udang *vannamei* merupakan salah satu jenis udang yang saat ini banyak diminati untuk dibudidayakan. Udang *vannamei* banyak dikembangkan untuk membantu meningkatkan produksi udang dan memenuhi gizi dalam negeri. Tujuan penelitian ini untuk mengetahui biaya, keuntungan dan kelayakan. Sampel petambak usaha budidaya udang *vannamei* diambil secara sensus dan berdasarkan pra survei. Jumlah responden diambil sebanyak 35. Data diambil melalui wawancara. Besar total biaya yang dikeluarkan untuk produksi udang *vannamei* sebesar Rp. 1.513.573.516,- total benefit sebesar Rp. 1.892.541.681,-. Ditinjau dari aspek kelayakan dinyakatan layak untuk diusahakan dengan nilai NPV sebesar Rp. 260.314.428,- Net BC sebesar 3,949, IRR sebesar 27,798% dan PbP sebesar 3,865. Sedangkan BEP produksi sebesar 25.018 dan BEP Harga sebesar Rp. 20.377,-. Analisis sensitivitas kenaikan harga benur udang *vannamei* ditoleransi sebesar 83,9452% dan Penurunan jumlah produksi udang *vannamei* ditoleransi sebesar 36,7772%.
