

Chapter Five

Conclusion and Recommendation

This chapter provides two major parts namely conclusion and recommendation of this research. Besides, the researcher summarizes the research including background of the research, aim of the research, and the result of the research. Then, the researcher proposes some suggestions after conducting this research.

Conclusion

The researcher chose the students' difficulties in learning English as the topic was that because students in a state vocational high school got low score in their test. Moreover, some students told that they faced difficulties in learning English. Besides, as students, they had responsibility to make themselves understand in learning English. In addition, teachers could help their students to overcome the difficulties by applying the appropriate method in teaching. Hence, the researcher investigated the students' difficulties in learning English at a state vocational high school.

The research question was answered by the finding of this research. The research question was about students' difficulties in learning English. Regarding the findings of the study, there were some difficulties faced by students in learning English. The difficulties came from the students, the environment, and the language.

In addition, in the first finding, the findings discovered came from the students who were related to the students' lack of motivation, lack of vocabulary, difficult in memorizing vocabulary, lack of grammar mastery, and anxiety. For the second finding, the difficulties came from the environment that was unsupportive

environment. In the third finding, the difficulties coming from the language itself also gave the difficulties for the students. Thus, the difficulties faced by the students were about the spelling problem, listening difficulties and misintonation.

Based on the findings, the difficulties faced by the students coming from three part; students, environment and the language. There are five difficulties coming from the students, one difficulties from the environment, and three difficulties from the language. It means that mostly the difficulties are coming from the students when they learn English.

Recommendation

Regarding the findings of this research, there are some suggestions for the students, teachers, institution, and the other researchers.

For the students. Based on the finding of the research, the students can understand kind of difficulties that they might face in learning English. Students are able to do some reflection to know what kind of difficulties that happen during learning process. After the students know exactly what their difficulties are, and it is better for students to figure out the strategies to minimize the difficulties. Besides, if students get difficulties on finding the strategies, they can ask for help to their teacher. Then, the students will find way to minimize the difficulties in learning process.

For the teachers. From this research, the researcher requires and recommends the teachers to give more motivation to the students, so they will have good willingness in learning process. Teachers are also required to help the students to minimize their difficulty. In addition, teachers are the people who can help students

in the process of learning while the students learn in the class, so they are required to have a good way in teaching in order to make students understand the language.

For the institution. Based on the research findings, the researcher recommends all stakeholders to take additional information from this research in order to renew the program, syllabus, or curriculum in teaching and learning process in order to overcome the students' difficulties in learning English. The researcher suggests that the institution has to always do the improvement in providing the book. Therefore, the institution needs to choose the books are appropriate to the students' need, so that it can help the teachers in teaching English in the class well.

For other researchers. The researcher recommends for other researchers who want to conduct the similar research to add the factor of the difficulties or the strategies used by the students in learning English. Besides, when students face specific difficulties, they need good strategies to overcome the difficulties. In addition, the other researchers will possibly to find the factor of getting the problems or the specific strategies in learning English.
