Conclusion

The general purpose of this study was to find out the teachers strategy in teaching students speaking. This purposes was to investigate what the strategy used by the teacher to teach students' speaking that the researcher has found the findings related to the purposes.

The objective was to find out the teaching speaking strategy used by the teachers at state Senior High School Banjarnegara. The finding showed that third participants applied third teaching speaking strategies in their teaching practice. The strategies were games, preesentation, and modeling.

Recommendation

Based on the result of this research, the researcher provides several recommendations. The recommendations are addressed to English teachers, institution, and the other researcher.

The English teachers. Based on the result of this study, the English teacher can implement the strategies in teaching students speaking well. They can also improve the strategies to make them confortamble teaching students speaking.

Institution. The institution is suggested to pay more attention to the teachers in teaching practice, especially the teachers' strategies in teaching speaking. The institution can also give more time allocation for the teachers in teaching, so they can teach the whole materials well using their strategies. Then, the institution can also make regulation to make the teachers easier to teach speaking for the students.

The other researchers. This research investigates the strategy to teach students' speaking. The other researchers are encouraged to conduct further related studies and use the result of this research as their reference. To follow up this study, the further researcher can find out the effectiveness of using the strategies by doing experimental study so that the effects of the strategies found in this study will be proven. It is because the researchers can prove the result either it is effective or not for the students speaking.
