Arya Adiningrat, PhD, from School of Medicine and School of Dentistry respectively, Faculty of Medicine and Health Sciences, Universitas Muhammadiyah Yogyakarta (“FMHS UMY”), and H. Sunny Sun, Ph.D. from National Cheng Kung University Medical College. Collectively referred to as “Participants”.

Purpose and Scope of The Collaboration. This statement describes the intention of the Participants to do collaboration in a multidisciplinary research project regarding molecular medicine and genomic medicine. Prospective topic: RAS genes SNP/Histone Modifications in Indonesian Population with Chronic Kidney Disease. Other topics may be considered. The final research topic will be updated accordingly.

The collaboration include, but not limited to, the following activities:

1. Discussion of research topics
2. Development of research protocol
3. Milestones of the research collaboration
4. Research training
5. Resource sharing
6. Knowledge transfer
7. Grant proposal writing
8. Provision of ethical clearance
9. Research publication in a reputable international journal
10. Provision of necessary documentation required for the research

Guiding Principles for the Collaboration. The Participants and their representatives will work under the following principles:

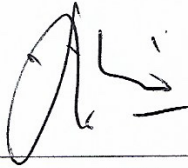

- Share information transparently to enhance the work related to the collaboration.
- Engage in communications that are transparent, open and collaborative.
- Responsibility for ensuring the success of the collaboration resides with all Participants.
- Mutual respect will be practiced when exploring all ideas and issues.
- Respect for the policies of the Participants and the rights of faculty, particularly with respect to academic freedom will be acknowledged.
- Intellectual property will be shared as appropriate, recognizing that rights will be governed by the applicable policies of the Participants and determined in accordance with those policies.
