

CHAPTER IV

CONCLUSION

4.1 Conclusion

Based on the results of the analysis from the study of the Impact of Village Funds management in Pringgowijayan Village, Kutoarjo District, Purworejo Regency Year 2017 it is concluded that village fund is a fund from *APBN* allocated to villages transferred through the district or city *APBD* and prioritized for the implementation of village development and the empowerment of rural community.

The amount of village funds budget in Pringgowijayan Village year 2017 was IDR 1.119.629.400 and were distributed in three stages namely the first period of distribution is carried out in April with a total of 40%, the second period of distribution is carried out in August with a total of 40%, the third period of distribution is carried out in October with a total of 20%.

In general, the implementation of village funds in Pringgowijayan Village has been well running. This can be seen from the dissemination of village funds that have involved community leaders, such as BPD, LPMD, PKK, Youth Organization and other society in Pringgowijayan Village. Programs from village funds carried out in year 2017 in the Pringgowijayan Village were programs of village development, training of farmers and ranchers, and PKH (Family Hope Programs) that aim to provide assistance from various aspects of society such as education, health, basic needs and others.

From all data what the author gets, it can be seen all impact from all program of village fund in Pringgowijayan village. Program that have a big impact on society welfare are construction of irrigation and family hope programs. In this case, the construction irrigation and family hope programs can improve several aspect of welfare to the rural community in Pringgowijayan village such as for improve society economy as well as decreasing the number of poverty and unemployment. The government succeeded to make big impact on society welfare with that program.

However, the government also failed in implementing one of the program. The program is village internet, the government can't management that program. The village government only provide of facilities internet without conduct about internet function for the villagers. Some people in the village disappointed with this program, why the government not plan for function to village can open business of online shop to improve of society economy in Pringgowijayan village. That's all the program is succeeded to implementing the government. Only one program is failed in implementing, but it still can the government repaired with conducted training strategy of business online shop for villager in Pringgowijayan.

4.2 Suggestion

Based on the results of the presentation of the conclusions above, then there are some following suggestions:

1. The author suggests that the Pringgowijayan village government can socialize village funds to the all society of Pironggowijayan Village;

2. The author suggests that the village government can balance of development between irrigation and village road;
3. For the village government, the author hopes to clean the remaining scatterd on the side of village road of Pringgowijayan to look better as before;
4. For the government, the author hopes to conduct training of strategy business online shop for villager, because if the program ways appropriate with the function it can improve to welfare especially to improve economy of Pringgowijayan villagers;
5. The author suggests that the Pringgowijayan village government be more thorough in collecting data on the society of poor, therefore that the incident that already has occurred will not happen anymore;
6. It is expected that the village government must have an increase in control and supervision for allocating village funds. Thus, the allocation of village funds can run well in accordance with the wishes of the rural development and the creation of a prosperous society.
7. For services provided to researchers, it is expected that the village government can store all documents from year to year so that researchers can easily get the information and add data needed for the research result.
