

ABSTRACT

The purpose of this study is to find the empirical evidence of Dark Triad Personality which consists of Machiavellianism, narcissism, and psychopathy on propensity to commit White-Collar Crime. A total of 146 questionnaire sheets were distributed to the fifth and seventh semester students in University of Muhammadiyah Yogyakarta. The Dark Triad Personality was measured by Short Dark Triad (SDM) while White-Collar Crime was measured by Accounting Fraud Scenario. Multivariate Analysis (MANOVA) was used as the analytical tools. The results indicate that Machiavellianism, narcissism, and psychopathy have a positive influence on propensity to commit an act of white-collar crime.

Keywords: Machiavellianism, narcissism, psychopathy, accounting fraud, white-collar crime.
