Sebanyak 184 kuesioner dikumpulkan untuk dianalisis data menggunakan Smart PLS 3.0. Metode analitik yang digunakan dalam penelitian ini adalah Structural Equation Model (SEM) untuk memverifikasi faktor-faktor yang mempengaruhi minat mahasiswa ilmu ekonomi untuk berkarir di industri keuangan syariah.

ABSTRACT

Due to low career interest in Islamic finance industry, Islamic finance industry in Indonesia run short of labor. Economy development has a big role in Islamic finance industry and a lot of the graduate available to fulfill needs of the industry. Economy development graduate could be solution for Islamic finance industry need but Islamic finance industry still struggle to find suitable workforce due to low career interest among Indonesian including their economy development graduate. There is a lot of economy development graduate available that could provide labors for Islamic finance industry but Islamic finance industry are still struggling to find suitable workforce due to low career interest among Indonesian. The purpose of this study is to investigate factors influence economy development students’ career interest in Islamic finance industry and fulfills identified need to study how shortage of Islamic finance industry could be resolved. Adapting from past literature and adjusted with the latest situation, the study has four goals, namely: (1) the effect of self-efficacy on economy development student’s career interest in Islamic finance industry; (2) the effect of Islamic financial literacy on economy development student’s career interest in Islamic finance industry; (3) the effect of religiosity on economy development student’s career interest in Islamic finance industry and (4) the effect of reference group on economy development student’s career interest in Islamic finance industry. This research is associative causal research with quantitative approach. The population of this research is undergraduate economy development student of Universitas Islam Indonesia, Universitas “Veteran” Yogyakarta, Universitas Ahmad Dahlan, Universitas Gadjah Mada who started their study in 2016. A total of 184 questionnaires were collected for data analysis using Smart PLS 3.0. Analytical method used in this research is Structural Equation Model (SEM) to verify factors influence undergraduate economy development students’ career interest in Islamic finance industry. The findings of the study suggest that undergraduate economy development students are influenced by self-efficacy, Islamic finance literacy and reference group, whereas religiosity is not influence undergraduate economy development student’s career interest in Islamic finance industry. Therefore, students’ career interest in Islamic finance industry could be increased by improving students’ self-efficacy on Islamic financial sector, improving their Islamic financial literacy and increasing their reference group in Islamic financial sector.

Keywords: Self-Efficacy, Islamic Financial Literacy, Religiosity, Reference Group.
