Evidence based practice

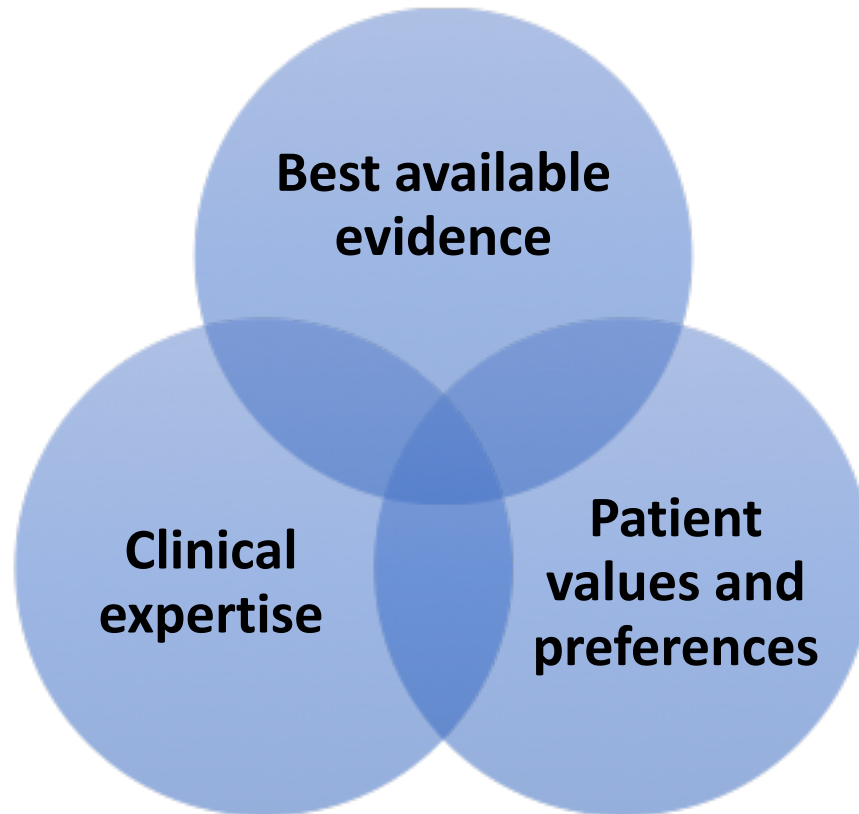

3 foundation of EBP:

1. Evidence
2. Clinical or professional expertise
3. Population or patient characteristic, needs and value

What is EBP process?

- EBP process is always starts and ends with the patient.
- 5 steps of EBP:
 1. Assess the Patient
 2. Ask questions
 3. Acquire the evidence
 4. Appraise the evidence
 5. Apply the evidence

Assess the patient

Be a good listener in order to gather information: physical, mental, emotional, spiritual condition and concern of the patient
