viii
F. Crude Palm Oil (CPO) in Indonesia 42
G. Policy on Freight Transportation Planning 45
  1. Indonesian freight transportation planning 46
  2. Indonesian regulations on regional and transportation planning 49

CHAPTER 3  THEORETICAL APPROACH 54
A. Theoretical Approach and Its Implication to the Research 54
  1. Regional transportation planning method 54
  2. Freight selection method 54
  3. Modelling approach 55
  4. Type of data 55
  5. Form of choice model 56
  6. Decision variables (attributes) 56
  7. Data collection strategy 57
  8. Utility function 57
  9. Stakeholders and decision making unit 58
B. Research Questions 59

CHAPTER 4  RESEARCH DESIGN 60
A. Research Framework 60
B. Data Requirement 64
C. Selection of Research Area 66
D. Population and Sampling 71
E. Statistical Analysis 72
F. Data Collection and Analysis 73
G. Secondary Data Collection 76
H. Database Construction 78
I. Tools Used in Data Collection and Analysis 79

CHAPTER 5  THE DEVELOPMENT OF METHODOLOGY FOR REGIONAL TRANSPORTATION PLANNING 80
A. The First Methodology for Regional Transportation Planning 80
B. The Latest Methodology for Regional Transportation Planning 83
C. Specification of Freight Transportation Planning Model 87
CHAPTER 6  RESEARCH FINDINGS RELATED TO FREIGHT TRANSPORT 93
A.  Origin – Destination Survey ........................................................................93
B.  Revealed Preference Survey in Central Kalimantan ....................................94
C.  Transportation Attributes Obtained from the Survey .................................96
   1.  Vehicle type and composition .................................................................96
   2.  The weight of loaded vehicle ..................................................................97
   3.  The speed of vehicle ..............................................................................97
D.  Relationship of Travel Distance and Travel Time .......................................98
E.  Relationship of Travel Distance and Travel Cost ......................................102

CHAPTER 7  MODEL DEVELOPMENT FOR IDENTIFYING THE
TRANSPORTATION INFRASTRUCTURES 103
A.  Modelling Framework ..............................................................................103
B.  The Important Factors Influencing the Efficiency of Regional Freight
Transportation ............................................................................................104
C.  Modelling Freight Transportation by Integrating Spatial Model ................106
   1.  Modelling location choice and spatial pattern of CPO production ........111
   2.  Modelling regional freight transportation of CPO commodity ............113
   3.  Analysis results and discussions ..............................................................114
D.  Application of the Inter-modality Concept into Spatial and Transportation
Models .........................................................................................................117
   1.  Model development in 2011 ..................................................................120
   2.  Model development in 2012 ..................................................................125
E.  The Transport Infrastructures Needed to Enhance Sustainable Freight Mobility in
the Region 141
   1.  Model specification ..............................................................................160
   2.  Accessibility of CPO factories ..............................................................160
   3.  Generalized cost by considering all CPO factories ...............................161
   4.  Generalized cost by considering CPO factories along rail link 1A and 1B 163
   5.  Utility function ......................................................................................166
   6.  Model calibration ...................................................................................167

CHAPTER 8  CONCLUSIONS AND FURTHER RESEARCH 169
# A. Conclusions

# F. Further Research

## REFERENCES

## APPENDICES

### A. Survey Questionnaires

1. Questionaire form of survey to shippers
2. Questionaire form of survey to carriers
3. Questionaire form of observation survey to truck
4. Questionaire form of observation survey to barge
5. Questionaire form of vehicle speed survey

### B. List of Respondent of RP Survey for Shippers

### C. Data Obtained from Origin-Destination (Observation) Survey

### D. Data Obtained from Revealed Preference (Intercept) Survey to Carriers

### E. Route of CPO Transportation from CPO Factories to Ports

### F. Photo Documentation of Research Activities

### G. Data Obtained from Modeling CPO Transportation Using ArcGIS in 2010 up to 2013

### H. Validation Data Obtaining from Transport Model using ArcGIS

### I. Input and Output Data of Modeling Utility Functions using SPSS Version 19

### J. Official Letter Related to the Research

## CURRICULUM VITAE
