## Bagian 1 Video 1

### What is a cause-effect essay?

---

- A formal writing that talks about the reasons why something happened or the effects of a phenomenon.
- In one essay, the focus is only on the causes or effects and not both. Focus means what you will discuss in the thesis statement and in the body paragraphs.

3

## Bagian 1 Video 2

### Checking the Introductory Paragraph

#### The hook:

- Have you used a background information of what happened **surround** you (your neighborhood)? Remember to **not** talk about what is too general (Indonesia, the world).
- Have you put information from a published source (journal article, web article, news, etc.)? If not, please add one to support your background.

#### Thesis Statement

- Do you have a thesis statement as the last sentence of your introduction?
- Does your thesis statement **clearly** state causes or effects of a phenomenon?
