Abstract

IDENTIFICATION OF POTENCIES OF PLANT BAMBOO DEVELOPMENT ZONE IN GUNUNGKIDUL. A research entitled “Identification of Potencies of Plant Bamboo Development Zone in Gunungkidul” Was held in the Sub-district of Playen from February up to May 2016. This study aims to assess the potential for the cultivation of bamboo in the district of Playen, Gunungkidul. This research was conducted using the observation method through primary and secondary data collection. The primary data obtained through primary and analysis of soil samples in determining soil characteristics. While secondary data obtained from a review of the literature and relevant agencies. The results showed that the Sub-district of Playen had potency of adequate fertility for the development of bamboo cultivation.

Keywords : Potency of Zone, development of bamboo cultivation, district of Playen Gunungkidul.
