

ABSTRACT

Oil spill in the Gulf of Mexico is not only problem for United States, for British Petroleum but also for environment around the Gulf of Mexico. The longer the time the bigger amount of oil spill in the Gulf of Mexico that closer to the United States coast. If this oil spill can't be finished soon, the damages of United States and British Petroleum will be bigger and bigger. So, it is needed cooperation between United States and British Petroleum to solve the oil spill in the Gulf of Mexico as soon as possible.

The purpose of this research is to describe the cooperation that United States and British Petroleum do to solve the oil spill in the Gulf of Mexico. This Cooperation between United States – British Petroleum in Solving the Oil Spill in the Gulf of Mexico research is limited just from the first spill (April 2010) until the spill finished (August 2010).

This research use descriptive qualitative method. Collecting data use secondary data through library research by using books, journal, mass media, and although websites which is relevant with the problem.

Keyword : Cooperation, United States, British Petroleum, Oil Spill.
