

## ABSTRACT

*This research aims to describe the transparency and accountability of e-procurement in the province in 2015. The aim of this research is to analyze what has been done by the BLP and LPSE DIY particular to achieve transparency and accountability. In addition, this research aims to analyze the problems faced in implementing e-procurement. Every year the number of auctions in Special Region of Yogyakarta is increasing along with the implementation of e-procurement system. This research wanted to see and analyze how the opinions of the providers who attended the auction in DIY in 2015 regarding the disclosure of all information of BLP and from LPSE DIY. Therefore, the hypothesis that e-procurement can realize the level of transparency and accountability. Second, e-procurement makes it easier for providers to participate in the auction.*
