

ABSTRAK

Penelitian ini bertujuan untuk menganalisis Rehabilitasi Pecandu Narkoba Dengan Pendekatan Agama dan Pengaruh Rehabilitasi Dengan Pendekatan Agama Terhadap Perubahan Kecanduan Pecandu. Subyek dalam penelitian ini adalah Konselor Agama yang merehabilitasi pecandu Narkoba dengan pendekatan Agama sesuai ajaran Agama Islam. Dalam penelitian ini peneliti mengambil obyek di Yayasan Al-Islamy Pondok Pesantren Rehabilitasi Mental Korban Penyalahgunaan NAPZA. Penelitian ini menggunakan metode deskriptif kualitatif dengan cara melakukan wawancara mendalam, pengamatan, dan dokumentasi.

Berdasarkan analisis yang telah dilakukan, diperoleh hasil konselor muslim yang melaksanakan rehabilitasi dengan pendekatan Agama yang mana sudah sesuai dengan ajaran Agama Islam dan proses pelaksanaan rehabilitasi tersebut belum terlaksana dengan baik. Pengaruh rehabilitasi terhadap perubahan mental, sikap dan perilaku klien tidak efektif serta perubahan tingkat kecanduan klien memiliki jangka waktu yang cukup lama.

Kata Kunci : Rehabilitasi, Narkoba, Konselor Agama

ABSTRACT

This study aims to analyze the rehabilitation of drug addicts with a religious approach and the influence of rehabilitation with a religious approach to addiction changes. Subjects in this study are religious counselors who rehabilitate drug addicts with religious approach according to Islamic religious teachings. In this study, researchers took the object in the Al-Islamy Institution, Islamic Boarding House For Mental Rehabilitation Of Drug Abuse Victims. This research uses qualitative descriptive method by conducting in-depth interview, observation, and documentation.

Based on the analysis that has been, it is obtained the results of muslim counselors who carry out rehabilitation with a religious approach which is already in accordance with the teachings of Islam and the implementation of rehabilitation process has not been done properly. The effect of rehabilitation on mental changes, attitudes and behavior of client is ineffective as well as the changes in the level of client addiction has a long period of time.
