		Challenges	Challenges factors in collecting data for development plan	What are the inhibiting factors of BPS in collecting data for development planning?
		Accuracy	Level of data accuracy from BPS	How accurate the data development planning from BPS?

INTERVIEW RESULT 1

Informant : JB Priyono (Chief of BPS Special Region of Yogyakarta)

Date : Wednesday, March 14th, 2018

Time : 13.00-14.00

Place : Office of BPS Special Region of Yogyakarta

Q = Question

A = Answer

Q: What is the Role of Central Bureau Statistics in Special Region of Yogyakarta Development Planning?

A: The current BPS data is intended to be a development field and will also be the focus for development. Therefore, BPS data is a barometer of development data collection.

Q: What factors affect the structural transition of BPS related to development planning of DIY's development planning?

A: Factors that cause the change of BPS organizational structure is usually done by testing Human Resources to measure the performance of employees of the Central Bureau of Statistics that meet the criteria.

Q: What is the position of BPS when supporting development planning data?

A: BPS collaborates with SKPD Yogyakarta Province established a forum to support development planning data. It can be seen the position of BPS members in the forum data.

Q: What are the types of internal and external meeting for development planning?

A: The type of external meeting held to discuss the development planning data collection method with the government such as: socialization meetings, coordination meetings, team meetings and meeting results. Meanwhile, for the internal meeting of BPS held a meeting of National and Regional levels.

Q: How is the development planning data distribution method to Regional Development Planning Agency?

A: There are several ways to get development planning data from BPS, the data can be obtained by downloading data on the BPS publication website or by sending an official letter to the BPS.

Q: How is the development planning data assessing?

A: To test the development planning data, BPS applies Quality Assurance Management.

Q: What types of development planning data provided by BPS?

A: The type of development planning data provided by the Central Bureau of Statistics relates to the data requested by the Regional Development Planning Board in the form of general data, social/cultural data, natural resources, infrastructure, industry, commerce, financial institutions, cooperatives, businesses, investments, economics and finance, politics, law, and security.

Q: Is there any complain from Regional Development Planning Agency related the collection of development planning data?

A: The Regional Development Planning Agency once provided a complaint related to the availability of development planning data provided by the

Central Bureau of Statistics, the complaint covered not yet fulfillment of data up to the RT/RW level, as well as the delay in collecting data which has been requested from the Regional Development Planning Agency.

Q: What are the goals of BPS in contributing data for development planning?

A: The goal of Central Bureau of Statistics in the development planning is that the data provided by the Central Bureau of Statistics can be used optimally.

Q: What are the inhibiting factors of BPS in providing development planning data?

A: Data quality improvement efforts in BPS DIY Province face some problems of both internal and external problems. From internal factors can be limited Human Resources and from external factors can be a level of public awareness to participate in contributing data development planning.

Q: How accurate development planning data provided by BPS?

A: The number of obstacles experienced by the Central Bureau of Statistics in collecting and processing the data of development planning causes the level of accuracy of data from the Central Bureau of Statistics has not reached 100%, but BPS still strive to optimize the performance of the organization to make development planning data more accurate.

INTERVIEW RESULT 2

Informant : Buhari (Chief of Directorate of Statistical Information System)

Date : Wednesday, March 14th, 2018

Time : 14.00-15.00

Place : Office of BPS DIY

Q = Question

A = Answer

Q: What are the tasks, functions and authority of BPS in DIY's development planning?

A: The task of BPS in the development planning of BPS runs the mandate of Law no. 16 year 1997 as base statistic provider, update development planning data and dissemination and utilization of results statistical activity. In BPS development planning, the BPS acted as the initiator, BPS acted as the initiator, BPS actively initiated the standard of concepts preparation, definitions, and classification.

Q: What factors affect the structural transition of BPS related to development planning of DIY's development planning?

A: Organizational needs, human resource quality improvement and BPS conduct assistance with the National Statistics of Australia are factors that cause the change of organizational structure of the Central Bureau of Statistics, especially in achieving improved quality of development planning data..

Q: What is the position of BPS when supporting development planning data?

A: BPS collaborates with SKPD Yogyakarta Province established a forum to support development planning data. It can be seen the position of BPS members in the forum data

Q: What are the types of internal and external meeting for development planning?

A: The type of external meeting held to discuss the development planning data collection method with the government such as: socialization meetings, coordination meetings, team meetings and meeting results. Meanwhile, for the internal meeting of BPS held a meeting of National and Regional levels

Q: How is the development planning data distribution method to Regional Development Planning Agency?

A: BPS in collecting data development planning use zero rupiah system, which means any organizations, institutions and individuals requesting data from the Central Bureau of Statistics. However, there is also a type of paid data that is intended for trustworthy agencies.

Q: How is the development planning data assessing?

A: To test the quality of development planning data, a Pilot Study was conducted where BPS established questionnaires, then the questionnaire was tested in the representative areas of Indonesia. After the test try the questionnaire is developed to be even better.

Q: How are the stages of preparation, collecting data and development data processing?

A: Stages in preparation, collection and processing of planning data through a long process and requires a long time. Therefore all parties involved in this process are expected to work together well.

Q: What types of development planning data provided by BPS? And what data is the most important to Regional Development Planning Agency?

A: In the development planning BPS provides various related data including economic data, social, culture, general data, infrastructure etc. But the data that became the focus in DIY development planning is the data of Human Resources and Economic Growth.

Q: Is there any complain from Regional Development Planning Agency related the collection of development planning data?

A: In fulfilling its duties and functions of providing data of BPS development planning often get complain from Regional Development Planning Board, because BPS has not been able to provide data on time and BPS has not been able to provide data with a short period of time.

Q: What are the goals of BPS in contributing data for development planning?

A: The purpose of BPS in development planning is BPS hopes that the data provided can be used as well as possible.

Q: What are the inhibiting factors of BPS in providing development planning data?

A: There are many inhibiting factors for BPS in providing development planning data, both internal and external. These factors are in the form of coordination that has not been optimal among institutions, unfinished human resources,

data processing software that is still problematic and the questions are too detailed make people reluctant to contribute in the availability of development planning data.
