

ABSTRAK

PENGARUH METODE *CONFERENCE* TERHADAP SIKAP TANGGUNG JAWAB MAHASISWA DALAM MENJALANKAN TUGAS PROFESI PADA STASE KOMUNITAS DI FAKULTAS ILMU KEPERAWATAN UNISSULA

Nutrisia Nu'im Haiya¹, Suryanto², Moh. Afandi²

Latar Belakang: Sikap tanggungjawab merupakan salah satu manifestasi tindakan nyata dari karakter alamiah seseorang yang bermoral atau berakhlak mulia dalam merespon suatu stimulus. Metode *conference* merupakan bagian dari metode pembelajaran lapangan yang diharapkan dapat memupuk dan meningkatkan sikap tanggung jawab mahasiswa dalam menjalankan tugas profesi sehingga seluruh mahasiswa dapat mencapai kompetensi praktik keperawatan pada stase komunitas. Tujuan penelitian adalah menganalisis pengaruh metode *conference* terhadap sikap tanggung jawab mahasiswa dalam menjalankan tugas profesi pada stase komunitas.

Metode Penelitian: Penelitian ini menggunakan metode kuantitatif dengan *Pre-Experimental One Group Pretest Posttest Design*, pemilihan sampel penelitian menggunakan *purposive sampling* 16 mahasiswa profesi ners pada stase komunitas. Penelitian dilakukan selama 6 minggu dalam satu stase komunitas, di minggu pertama dilakukan observasi dan minggu kedua mulai pelaksanaan *conference*. *Pretest* dan *posttest* dilakukan 1 kali sebelum dan sesudah 5 kali pelaksanaan metode *conference*.

Hasil: Analisis penelitian ini menggunakan *Wilcoxon test* dengan hasil signifikan *p value* 0,000. Nilai *pretest* sikap tanggung jawab dalam penelitian ini kategori kurang 25%, cukup 25% dan baik 50%, setelah pelaksanaan metode *conference* nilai sikap tanggung jawab dalam kategori baik 12,5% dan sangat baik 87,5%.

Kesimpulan: Metode *conference* dapat meningkatkan sikap tanggung jawab mahasiswa dalam menjalankan tugas profesi pada stase keperawatan komunitas di Fakultas Ilmu Keperawatan UNISSULA

Kata kunci: metode *conference*, sikap tanggung jawab mahasiswa, stase komunitas

ABSTRACT

THE INFLUENCE OF CONFERENCE METHOD TOWARD CO-NURSES' ATTITUDE OF RESPONSIBILITY IN PERFORMING THEIR PROFESSIONAL WORKS ON COMMUNITY STAGE IN FACULTY OF NURSING UNISSULA

Nutrisia Nu'im Haiya¹, Suryanto², Moh. Afandi²

Background: The responsibility comprises an attitude that becomes one of the manifestations of the real conducts of the natural noble person in response to stimulus. Thus, the responsible nature need to be nurtured. Conference method that is a part of nursing field works is expected to nurture and increase co-nurses' responsibility attitude in performing their profesional works so that they can master pratical nursing competence at community stage. The study aimed to analyse the influence of conference method toward co-nurses' responsibilities in peforming their professional work at comunnity stage.

Methods: This study used a quantitative method with Pre-Experimental Design One group pretest posttest, the selection of the sample used purposive sampling of 16 co-nurse in the community stage. Pre test and post test were carried out once before and after the implementation of conference method for five times. The duration of conference method implementation was for six weeks.

Results: This analysis used the results of Wilcoxon test with a significance of p value 0,000. The pretest score on their responsibility attitude in the research before the implementation of conference methods showed that 25 % participants were in low category, 25% in medium category, 50% in good category, and none in very good category. After the implementation of the conference method, posttest score indicated that none of them was included in low and medium category, and 12.5% in good category. Significant increase existed in the very good category since there were 87,5% respondents included in this category.

Conclusion: The conference method can improve the co-nurses' responsibility to perform their professional works on community stage at the Faculty of Nursing UNISSULA

Keywords: conference methods, co-nurses' attitude of responsibility, community stage
